EDUCATION

University of Ottawa, Ottawa — *Software Engineering*

September 2016 - December 2020

GPA: 8.72/10 (Dean's Honour List)

Programming Coursework: Data structures and algorithms, Operating Systems, Discrete Math, Databases, UI Design

EXPERIENCE

Kinaxis, Ottawa, Canada — *Quality Assurance Intern*

May 2019 - August 2019

- Reduced the average time of generating RapidResponse business cases tests by 90% by developing InTeGeR, a tool that records RapidResponse user interaction and generates the equivalent test, written in Java. This tool is now used by all Kinaxis employees to generate tests.
- Wrote Ansible playbooks to automate the installation of applications and configuration of all the machines in our testing infrastructure

Morgan Stanley, Montreal, Canada — *Software Analyst*

January 2018 - April 2018

- Redesigned and developed the core functionality of a secured file sharing system that is available to all external facing customers

PROJECTS

Match

- A private document analysis, indexing and searching software for documents in a siloed file share.
- The application walks through the share, picking each document and extracting the text it contains and its metadata using libraries such as PDFBox and Apache POI, indexes the information to a lucene index that can be searched in real time.

SKILLS

PROGRAMING LANGUAGES

- Java (3 years)
- Python (3 years)
- SQL (2 years)
- C# (1 year)
- Java Script (1 year)
- Groovy (1 year)

PLATFORMS & FRAMEWORKS

- Git
- Ansible
- Jenkins
- Angular
- React

AWARDS

- Winner at Startup weekend Ottawa.

LANGUAGES

English, French, Yoruba
